Valmichael,

The below email is a re-send of the photos that I sent to you yesterday afternoon. It sounds like it did not send properly the first time; sorry about clogging up your inbox if this is the second time you are receiving it.

Valmichael,

I've attached 3 photos to this email that depict the armored cap enhancement construction. Descriptions are as follows:

9495635

2014-01-21.02 – Constructing the enhanced slope along the South Berm in the Eastern Cell using an excavator (for grading the rock) and skid steer (for transporting rock from the stockpile and placing it)

2014-01-21.08 – South Berm in the Eastern Cell after completion of the enhancement work

2014-01-22.02 – Central Berm on the eastern slope, near the north end of the berm, after completion of the enhancement work

These photos were originally about 5 MB each, so I reduced the file size. If you would prefer the original higher resolution photos let me know and I can send them along.

Thanks,  
Randy

Randy,

In preparation for a EPA public meeting next week on Thursday January 30, 2014 will you send me some “choice” quality photos of the current work your doing on cap. Stay warm today!
